NAME OF SIGNER (PLEASE PRINT)

APPLICANT OR AUTHORIZED AGENT PERSONALLY REPRESENTS AND WARRANTS THAT THEY HAVE THE FULL RIGHT, POWER AND AUTHORITY TO EXECUTE THIS PERMIT APPLICATION ON BEHALF OF OWNER.

NON-RESIDENTIAL SEWER CONNECTION

For the purpose of procuring said permit the below signed does hereby represent, covenant and agree to and with the North Shore Water Reclamation District (District or NSWRD) as stated below:

- A. ***In accordance with Section 4.03 a) of the District's Ordinance Relating to Sewers and Sewer Systems, if an Illinois Environmental Protection Agency permit has been issued in conjunction with this permit, then the permit shall expire on the expiration date of the Illinois Environmental Protection Agency Permit. All fees and charges assessed under the conditions of the District permit are forfeited by the Applicant/Owner upon expiration of the permit.***
- B. That all work done pursuant to the permit herein applied for shall be strictly in conformity with, "An Ordinance Relating to Sewers and Sewer Systems" (a copy of which is available upon request, or may be downloaded at www.northshorewrd.org) regulating the design, construction, operation, maintenance and use of the proposed or existing sewer or sewer system, and with the description of the work herein contained, and with the plans and specifications for said work hereunto attached.
- C. The Applicant understands and acknowledges that the District reserves the right to periodically review the facility's actual discharge flow and loadings to determine whether the facility is complying with the limits of its existing permit. At any time should the facility's two year average discharge trigger IEPA permitting requirements (currently 15 PE greater than the permitted usage for domestic waste and any increase in PE for non-domestic waste), the facility agrees to permit the site for the deficient PE.
- D. That Applicant shall restore all sewers, appurtenances, pavement and/or other structures or surfaces disturbed by the work of making connection to the sewerage works of the District, to as good condition as the same existed at the time of commencement of said work and in accordance with the regulations and easements of the District.
- E. That Applicant shall indemnify and save harmless the District from any and all loss, cost, damage and expense which may come to the District by reason of or in any manner growing out of or connected with said work, or the resulting connection to and subsequent use of any facilities, provided, however, that the liability, if any, of the applicant to the District shall not be limited to the specific liabilities mentioned, but the Applicant shall in any event be liable to the District for any and all loss, cost, damage and/or expense of every kind and character arising from, growing out of and/or connected with such work or the resulting connections to and subsequent use of any facilities.
- F. That in case of any suit, action or proceeding against the District for damages or on account of any liability or claim arising from, growing out of or in any way connected with said work, Applicant shall, on demand of the District, enter his or its appearance therein, defend the same and pay all the costs, attorneys' fees, solicitors' fees and expense thereof and the amount of any and all final judgments, decrees and/or awards against the District entered or made therein.
- G. The Applicant or his sewer contractor agrees to notify the District and the municipality or public entity within whose jurisdiction the work will be performed at least forty-eight (48) hours prior to the commencement of the work to be done. Failure to do so will result in the assessment of the No Notification Fee, and could result in additional penalties, fines, and enforcement action up to and including termination of service.
- H. The Applicant hereby releases the District from any and all claims, causes of action and the like which might or may arise by virtue of this Application, any permit connection hereunder, any connection made as a result of said permit and any use of any facility or equipment of the District as a result of the foregoing, including but not limited to any act of the District or any failure of the District to act.
