

Over the next two years, North Shore Water Reclamation District will be replacing our sludge clarifier collection system and performing concrete repairs in sixteen (16) final clarifiers at our Waukegan Water Reclamation Facility located at 325 Dahringer Road. The work is necessary to repair aging infrastructure and to ensure the continued reliable processing of wastewater at our Waukegan Facility. This rehabilitation is being financed by the Clean Water State Revolving Fund (SRF). The SRF program is administered by the Illinois Environmental Protection Agency and receives a portion of its money to fund these types of projects from the U.S. Environmental Protection Agency. SRF programs operate in each state to provide communities the resources necessary to build, maintain, and improve the infrastructure that protects one of our most valuable resources: water.
