NORTH SHORE WATER RECLAMATION DISTRICT COMPLETES RESTORATION AND PRESERVATION WORK AT SUNRISE BEACH

The North Shore Water Reclamation District (NSWRD) Board of Trustees is pleased to announce the completion of the Lake Bluff Sunrise Beach revetment project. Due to the excellent work of John Keno & Co. and AECOM the project was accomplished in a timely fashion with little or no disruption to neighboring residents or visitors. Led by Tom Swarhout, Ward 4 Trustee (Lake Forest, Lake Bluff, and North Chicago), the District staff worked closely with the Village, the Park District, and the contractor to ensure the success of this major undertaking that will protect Lake Bluff's valuable community asset for many years to come.

"We are quite pleased with the final outcome," stated Trustee Swarhout. "It exceeds all expectations. In addition to protecting the District's Pumping Station, the work will also allow an increase in sand collection at Sunrise Beach. This is certain to enhance the beauty of this expanse of Lake Michigan shoreline which is a centerpiece of the Village of Lake Bluff."

Upon completion of the NSWRD's work, the Village of Lake Bluff and the Lake Bluff Park District resumed their revetment efforts at Sunrise Beach. Residents and visitors alike can look forward to enjoying outdoor activities with family and friends in the not-too-distant future. For more information about the role of the NSWRD, please contact us at

Info@NorthShoreWRD.org.

The North Shore Water Reclamation District is a municipal body dedicated to the beneficial reuse of our water resources while protecting Lake Michigan, local waterways, and the

environment through sustainable and fiscally responsible wastewater reclamation practices at our facilities. The NSWRD owns and operates 3 major Water Reclamation Facilities (WRF) located in Gurnee, Waukegan, and Highland Park, Illinois, and more than 100 miles of intercepting sewer lines and 10 pumping stations which collect and convey wastewater from local sewer systems to the WRFs. Additional NSWRD facilities include the Biosolids Recycling Facility in Zion, the Administration Building and Laboratory in Gurnee, and the Maintenance Building in Waukegan. The District is the 2nd largest water reclamation district in Illinois serving more than 300,000 people in eastern Lake County. For more information about the NSWRD please visit <http://www.northshorewrd.org/>.
